SKILLS

Frontend: JavaScript, Vue.js, Nuxt.js, Vuetify, React.js

Backend: PHP (Laravel, Yii2), Node.js

Database: MySQL, MongoDB

Tools & DevOps: Git, Bitbucket, JIRA, Workbench, Confluence, Asana, Jenkins

EXPERIENCE

Sr. Software Developer   Codefire Technologies, Noida   May 2018 – Current

- **Frontend Development:** Built responsive, component-based UIs using Vue.js, Nuxt.js, and Vuetify, including dashboards, forms, data tables, and modals with custom themes and optimized layouts.
- **Backend & API Integration:** Developed and maintained secure REST APIs using Laravel and Node.js; integrated third-party APIs like payment gateways and CRMs.
- **Custom Web Plugins & UI/UX:** Created 10+ custom plugins for CMS and eCommerce platforms; enhanced user flows and component usability in collaboration with designers and stakeholders.
- **Collaboration & Code Quality:** Worked with cross-functional teams (Web, Android, iOS), managed code with Git/Bitbucket, participated in code reviews, CI/CD workflows, and handled client communication and technical consulting.

Software Developer   Qualcentric Web Solutions,Noida   Feb 2017 – May 2018

- **Backend Development & APIs:** Built RESTful APIs and backend logic using PHP (Laravel/Yii2) and Node.js for web and mobile applications; integrated third-party services like payment gateways and authentication systems.
- **Database & Code Management:** Designed and optimized MySQL databases for performance and scalability; maintained clean, collaborative codebases using Git across multiple environments.
- **Cross-Platform Collaboration:** Worked closely with Android and iOS teams to ensure smooth integration between mobile features and backend services.
